

Ideation Phase

Define the Problem Statements

Date	18-June-2026
Project Name	HouseHunt - House Rental Platform
Maximum Marks	2 Marks

Customer Problem Statement Template:

Create a problem statement to understand your customer's point of view. The Customer Problem Statement template helps you focus on what matters to create experiences people will love.

A well-articulated customer problem statement allows you and your team to find the ideal solution for the challenges your customers face. Throughout the process, you'll also be able to empathize with your customers, which helps you better understand how they perceive your product or service.

Example:

PS	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	A first-time renter/ young professional	Find an affordable apartment near my workplace	Searching multiple websites is time-consuming and confusing	Most platforms lack essential filters and virtual tours	Frustrated, overwhelmed, and uncertain
PS-2	A property owner/landlord	Rent out my property and find reliable tenants	Managing inquiries and documentation is tedious	No central platform for managing all aspects	Stressed and inefficient
PS-3	A real estate agent/broker	Manage client listings and close deals faster	Lack of analytics and client engagement tools	Current platforms don't provide real-time insights	Limited in growth and opportunities
PS-4	A corporate relocation manager	Find suitable accommodation for relocated employees	Bulk searching and coordination is cumbersome	No platform supports bulk/corporate listings	Burdened with manual work

Additional Notes:

- Focus on understanding pain points rather than jumping to solutions.
- Each problem statement should reflect a real customer segment.
- Emotions matter—capture how the problem makes the customer feel.
- Use these insights to drive your design and development decisions.
